General Approach to Teaching Physical Interventions

St Anne's Positive Behaviour Support utilises a positive behaviour management approach to support adults with learning disabilities, mental health issues and individuals from homeless services who may present with behaviours of concern.

This training approach is clearly backed by robust policy and procedures on Positive Behaviour Support. St Anne's Positive Behaviour Support is part of a wider strategy developed and adopted by the organisation which includes induction training for all new staff and an extensive internal training programme covering all mandatory requirements. St Anne's Positive Behaviour Support (ST-ACS team) will work with commissioning organisations to develop bespoke packages focused on their organisation's policy and procedures and core philosophy.
