

all about people

"Excellent tutor. Huge amount of knowledge gained, and great discussions giving us new perspective and information."

"I've learned new ways of working with our clients through a greater understanding of communication and new perspectives - from trainers with a bit more experience and inspiration."

Effective Communication

'Communication is vital to us all as human beings. It enables us to socialise with others and make sense of what is going on around us. If we cannot speak, understand words or read and write very well we are often excluded unless others around us are prepared to change'

'Communicating effectively with people with a learning disability', BILD 2011

Our Effective Communication training identifies practical ways of supporting communication with people with learning disabilities and explores why, what and how people communicate.

Programme

BILD's Communication programmes explore why, what and how people communicate. They examine the effect of the environment on communication, and the role of the communication partner.

Participants will learn about practical ways in which they overcome barriers to communication with people with learning disabilities.

In addition to the one day programme 'Introduction to effective communication', BILD offers programmes which offer an in depth look at one particular aspect of communication:

- Sensory approaches to communication
- Visual approaches to communication
- Communication and behaviour
- Autism and communication

These programmes can be adapted to meet the specific needs of staff in your organisation, contact us to discuss what you are looking for and how we can help provide that for you.

Certified for your Continuous Professional Development

This training has been CPD Certified. Attendance will allow you to gain CPD points towards your Continuous Professional Development requirements.
