

The Valuing People Alliance: A coalition of BILD, NDTi and LDE

We also work closely with CBF, Respond, Paradigm-UK, and other VCSE organisations

We are committed to improving the health & well-being of all people with learning disabilities. This includes all people with learning disabilities including those who have autism and/or MH conditions, and people who may be in contact with the CJS, and their family/carers. We are keen to work collaboratively with other members of the alliance where we can mutually enhance and strengthen each other's work.

We are solution focused. We are therefore interested in developing best practice guidance. However we are aware best practice guidance is not always implemented so impact may be limited. Therefore any best practice guidance we develop will be supported by a webinar, use of social media and other communication methods such as blogs and newsletters. Where possible, it will be supported by a Community of Practice to share learning and practical tips. By having suites of work like this we can maximise our impact.

Examples of areas of work we are interested in include:

- Co-production
- Advocacy (self-advocacy and non-instructional advocacy)
- Reasonable adjustments
- Restraint Reduction
- PMLD
- Transforming Care and improving support in the community for people with complex needs
- Workforce development
- Driving up quality and developing Positive organisational culture
- Human Rights based approach
- Housing
- Tackling the determinants of health inequalities including unemployment, poor accommodation, isolation, discrimination and lack of access to services

Our main points of contact:

Ben Higgins (BILD)
